Bibliografía de Fisica Teórica 2

- Modern quantum Mechanics, J.J Sakurai.
- Quantum Mechanics, Vols. I and II, Claude Cohen-Tannoudji, Bernard Diu and Franck Laloë. (Desde el 2020 se encuentra disponible la 2da edición que está bastante mejorada en algunos aspectos).
- Quantum Mechanics Gennaro Auletta, Mauro Fortumato, Giorgio Parisi
- QUANTUM MECHANICS: A Paradigms Approach, David H. McIntyre.
- Quantum Mechanics: A Modern and Concise Introductory Course, Daniel Bes.
- Quantum Physics, Michelle Le Bellac.
- Introduction to Quantum Mechanics, D.J. Griffiths.
- Lectures on Quantum Mechanics, del Premio Nobel S. Weinberg.
- Quantum Mechanics a modern development, L Ballentine.
- Introductory Quantum Mechanics, R.L. Liboff.
- The Principles of Quantum Mechanics, P.A.M. Dirac.
- Quantum Mechanics, Eugen Merzbacher.
- Mecánica cuántica, teoría no relativista, Lev Landau and E.M Lifshitz.

- The Quantum Mechanics Solver, Jean–Louis Basdevant and Jean Dalibard.

- Gerry, Knight, “Introduction to Quantum Optics”.

- Walls, Milburn, “Quantum Optics”.

- Scully, Zubairy, “Quantum Optics”.
